PROJECTS

SAME PAGE **SAMEPAGEHEROKUAPP.COM**

A MVC app built using MySQL and Express to keep two households on the same page.

*Same Page is aimed at blended families (two households, where the kids move back and forth between parents or guardians), but could be used by any group of people trying to track money, keep a calendar, and have a shared to do list. To see the entire log-in process, register a user profile. Or, log-in using: **hackabulldurham@gmail.com** and **samepage** as a password.*

BABY BEAR BOOKS **BABYBEARBOOKSHEROKUAPP.COM**

A new kind of bedtime story built with React.

The first in what could become a series of interactive storybooks meant for parents and kids to read together. Type in your own name on the first pages of the book and follow along as you visit animals at the zoo. This site has the look and feel of a book: large, colorful images and pages that "flip" on the next page click. Readers drag and drop images to move the plot of the story forward.
